Radium

Curve

The Curve embodies the future of Fingerprint Biometrics – LES Film imaging technology. Utilizing the same LES Film certified in the world's first non-optical FBI Certified scanner, the Curve establishes the new standard in biometric performance for commercial applications.

Hardware Features

> Curved surface: More Surface Contact with Less Ridge Distortion
> Multi-Color LEDs: Direct Feedback for Users
> Sensor Auto-On Control: Touch & Go
> Operates in direct sunlight: Anytime Anywhere
> Low power consumption: Low Drain
> Low Maintenance: No Latent Residue Cleaning
> No prisms or silicon pads: Durable

SDK v3.0 Features

> No Site or User License Fees
> Template Generation & Matching
> Full Featured Active-X / .NET control
> Web Compatible
> Multi-threaded DLL
> WSQ Compression
> Scalable
> MS Certified USB Drivers
> Developed and Supported by IB

Enrollment Tools

> Enrollment NFIQ Image Quality Measurement
> Enrolled Finger Tracking
> 3 Image Enrollment Integration for Best Performance

Platform Support

> Windows 7, Windows 8 – all versions
> Windows Server 2003 & 2008
> Windows XP Pro
> Vista – all versions
> Linux 2.6 x Kernel
> NetBSD 4.0

Supported Languages

> Windows
       C#, C++, VB.NET, VB 6.0
> Linux
       C / C++
> NetBSD
       C / C++
> JAVA
       Support available on request
> Android

Embedded Systems Support

> Recompile for specific processors / OS available
> Gumstix available
